

Media Management for Children...It's Time

Cable connectors easily lock into the back of the MIKKO Que.

- Hardware/Software Solution
- Simple installation and setup
- Manages multiple users, allows individual scheduling
- Manages start time (access) and stop time (access denied)
- Manages the total usage of time on multiple media devices

Fast Fact:

The latest medical research shows the average child spend **45 hours per week** on media devices, while spending only 17 with parents and 30 in school.

-Kaiser Family Foundation

Founded by two fathers, MIKKO is an electronics company specializing in home media time management systems. Helping parents teach children good time management skills with the amount of time they watch television, play video games and use the internet.

The MIKKO Que is a universal device that manages the amount of time children can watch television, use the Internet and play video games.
